

GURU PRASAD M

Chennai, India • +91-9480246319 • guruprasad4790@gmail.com

SUMMARY

Senior Software Engineer with 14+ years of experience in distributed telecom systems and real-time processing. Experienced in debugging complex system issues, including regression and integration-related failures, and maintaining stability in production environments. Strong track record of identifying root causes and resolving issues across component boundaries.

CORE SKILLS

Languages: C++, Python, SQL, Shell

Systems: Distributed Systems, Real-Time Processing, Linux

Protocols: IMS, SIP, Diameter

Tools: Redis, Docker, Jenkins, Git

Practices: Debugging, Incident Handling, System Stability

PROFESSIONAL EXPERIENCE

Technical Lead — Xoriant (Cisco UCSM)

Aug 2024 – Feb 2026

- Diagnosed and resolved 30+ defects across server and networking components, including regression issues introduced by new feature integrations.
- Performed live debugging in complex, interdependent systems to identify root causes across component boundaries.
- Led a team of 9 engineers while contributing hands-on to debugging and issue resolution.
- Handled escalations related to system instability, coordinating across teams to drive fixes and stabilize releases.

Independent Project — Execution and Delivery

Mar 2026 – Apr 2026

- Executed a time-bound on-site project involving diagnosis and rebuild of a lime-based wall system, coordinating across multiple stakeholders to meet fixed deadlines.

Senior Software Engineer — Cloudtern (Pareteum MVNE)

Dec 2020 – Apr 2024

- Designed Redis-based session handling to enable stateless processing in real-time charging systems.
- Improved system flexibility through JSON-based configuration management.
- Resolved defects in billing and session handling systems through root cause analysis.
- Built REST-based mechanisms for dynamic configuration updates.

Technical Lead — HCL (Cisco / Synamedia)

Nov 2018 – Jul 2020

- Optimized subtitle processing system, reducing AWS storage and request overhead.
- Provided on-call support and resolved high-priority issues in live environments.

R&D Engineer — Nokia Networks (IMS Core Platform)

Aug 2014 – Oct 2018

- Developed and enhanced charging and signaling components across IMS core systems.
- Implemented protocol-level enhancements including location tracking and access class updates.
- Improved system efficiency by redesigning location processing logic.

Software Engineer — CSG International (Singleview)

Oct 2013 – Aug 2014

- Maintained telecom billing systems and resolved defects in production environments.

R&D Software Engineer — Aricent (ComverseONE)

Sept 2011 – Oct 2013

- Enhanced Diameter modules and implemented charging features for telecom services.

EDUCATION

B.E. Computer Science and Engineering

2011

Sir M. Visvesvaraya Institute of Technology
